Land use Forest Da Nhim, Da Chais, Vietnam

Description Forest Da Nhim, Da Chais, Vietnam

ECONOMIC VALUE

	Benefits	Costs (Excluding labour)	Labour	Informal labour
Forest goods				
Timber	--	5.00 EUR/ha	--	No
Fuelwood	5.00 EUR/ha	--	.05 Days/ha	Yes
Charcoal	--	--	--	Yes
Non timber forest products	5.00 EUR/ha	--	--	Yes
Bushmeat	--	--	--	Yes
Forest services				
Watershed protection	24.00 EUR/ha	--	.20 Days/ha	Yes
Tourism	12.00 EUR/ha	--	.10 Days/ha	No
Option and existence	1.00 EUR/ha	--	--	Yes
Other	--	--	--	Yes
Total	47.00 EUR/ha	5.00 EUR/ha	.35 Days/ha	

These are the forests benefits and costs estimated on average per hectare and per year. The estimated value in Euros may have changed with evolving exchanged rates since the creation date of this worksheet. The option value corresponds to the value given to the conservation of an asset for its future use. The existence value reflects the benefit of knowing that a particular environmental resource (such as this forest) exists. These values are difficult to estimate. Informal labour is indicated especially when the majority of the workforce comes from family members.
